

## Product Overview

The SPV700EC(AC) is a compact, oil free, low maintenance compressor designed for applications that require a continuous duty quiet pump for medium pressure and medium suction power, high chemical and heat resistance. Typical applications include autoclaves, airbrush, gas monitoring, medical lab equipment and bubbler level control systems. Design features include a motor shaft with multiple ball bearings, optimum noise/vibration reduction with rubber sheathed ball bearings, shock absorbers and standard filters.
